# SUSTAINABILITY Report

2024

Prepared by  
**GRILTEX POLSKA**

[www.griltex.com](http://www.griltex.com)

We care for the environment  
and future generations

**Griltex Polska Sp. z o.o.**

# IN LINE WITH THE PRINCIPLES OF SUSTAINABLE DEVELOPMENT

At the heart of our operations lies a strong commitment to the environment and future generations. In 2024, we continued to develop a regenerative production system for geosynthetics — one that gives plastic waste a second life. Instead of ending up in landfills, waste enters our closed-loop process to become a durable and eco-friendly product.

## Recycled material

Creating value from recycled material is essential to building a true circular economy. By integrating recycle into our products, GrilTEX continues to reduce landfill waste while delivering high-performance solutions.

Goal n.12 of the 2030 Agenda for Sustainable Development

"We are already building the future today.  
We produce our materials with a passion  
for a sustainable world and future  
generations"

ROMAN PUCHYŁA  
CEO

# GOALS FOR THE FUTURE

In 2024, we strengthened our analysis of energy and water consumption, CO<sub>2</sub> emissions and waste generated during production.

We implemented effective and economically viable changes to minimize our environmental footprint while maintaining efficiency and competitiveness.

## Results for 2024:

**131.88** ★

Emissions  
[tCO<sub>2</sub>e/year]

**0.035** ★

Emissions per m<sup>2</sup>  
[tCO<sub>2</sub>e/year and m<sup>2</sup>]

**2.75** ★

Emissions per employee  
[tCO<sub>2</sub>e/year and employee]

Market-based (emissions resulting from the consumption of energy purchased from a seller selected by the organization and calculated on the basis of the individual emission index of the fuel structure of a given seller.)

# GOALS FOR THE FUTURE

---

# REACHING CARBON NEUTRALITY BY 2050

---

"At Griltex, we believe that building a sustainable future starts with responsibility – for our processes, our products, and the legacy we leave behind."

---

ANNA PUCHYŁA-RAU  
VICE-PRESIDENT OF THE MANAGEMENT BOARD

We are already building the  
future today.

# GEOSYNTHETICS AND THE SDG'S:

---

Appropriate use of geosynthetics can make a significant contribution to achieving sustainable development goals, including resource conservation, access to clean water, emissions reductions, climate change and other environmental issues.

**The use of geosynthetics ensures reduction of energy consumption and emissions by:**

---

**Less excavation and on-site placement**

**Limited transport of large-sized construction materials**

**Facilitating faster and simpler construction**

**Extending the life of the designed infrastructure and reducing maintenance**

**Contribution to the production and storage of green energy**

**SUSTAINABLE  
DEVELOPMENT  
GOALS**

# GEOSYNTHETICS AND THE SDG'S:

---

**Surface and groundwater is preserved and safeguarded from contamination via:**

---

**Landfill lining and containment of hazardous waste**

**Sludge dewatering and purification, and silt fence systems**

**Construction of sludge and tailings lagoon capping reducing mine and quarry impact**

**Grey water storage for use in irrigation and buildings**

**Preservation of potable and irrigation water supplies by lining canals, dams and reservoirs**

**Prevention of run-off contamination**

**SUSTAINABLE  
DEVELOPMENT  
GOALS**

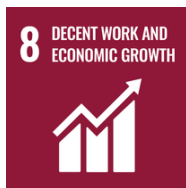

# LOCAL PEOPLE

---

We strive to create a workplace that is safe, inclusive and future-ready. Across all areas of our business, we invest in people – their safety, growth and wellbeing.

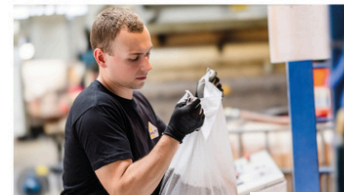

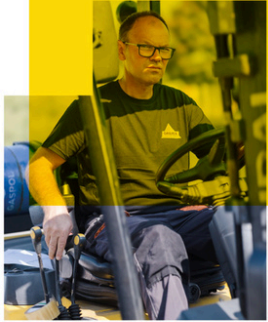

## OUR PEOPLE

Our values emphasize continuous learning and mutual respect. We operate with transparency, honesty and trust. As one team, we build strong connections, foster innovation, and welcome new ideas.

# Our people **GRILTEX**

People remain our most  
valuable resource.

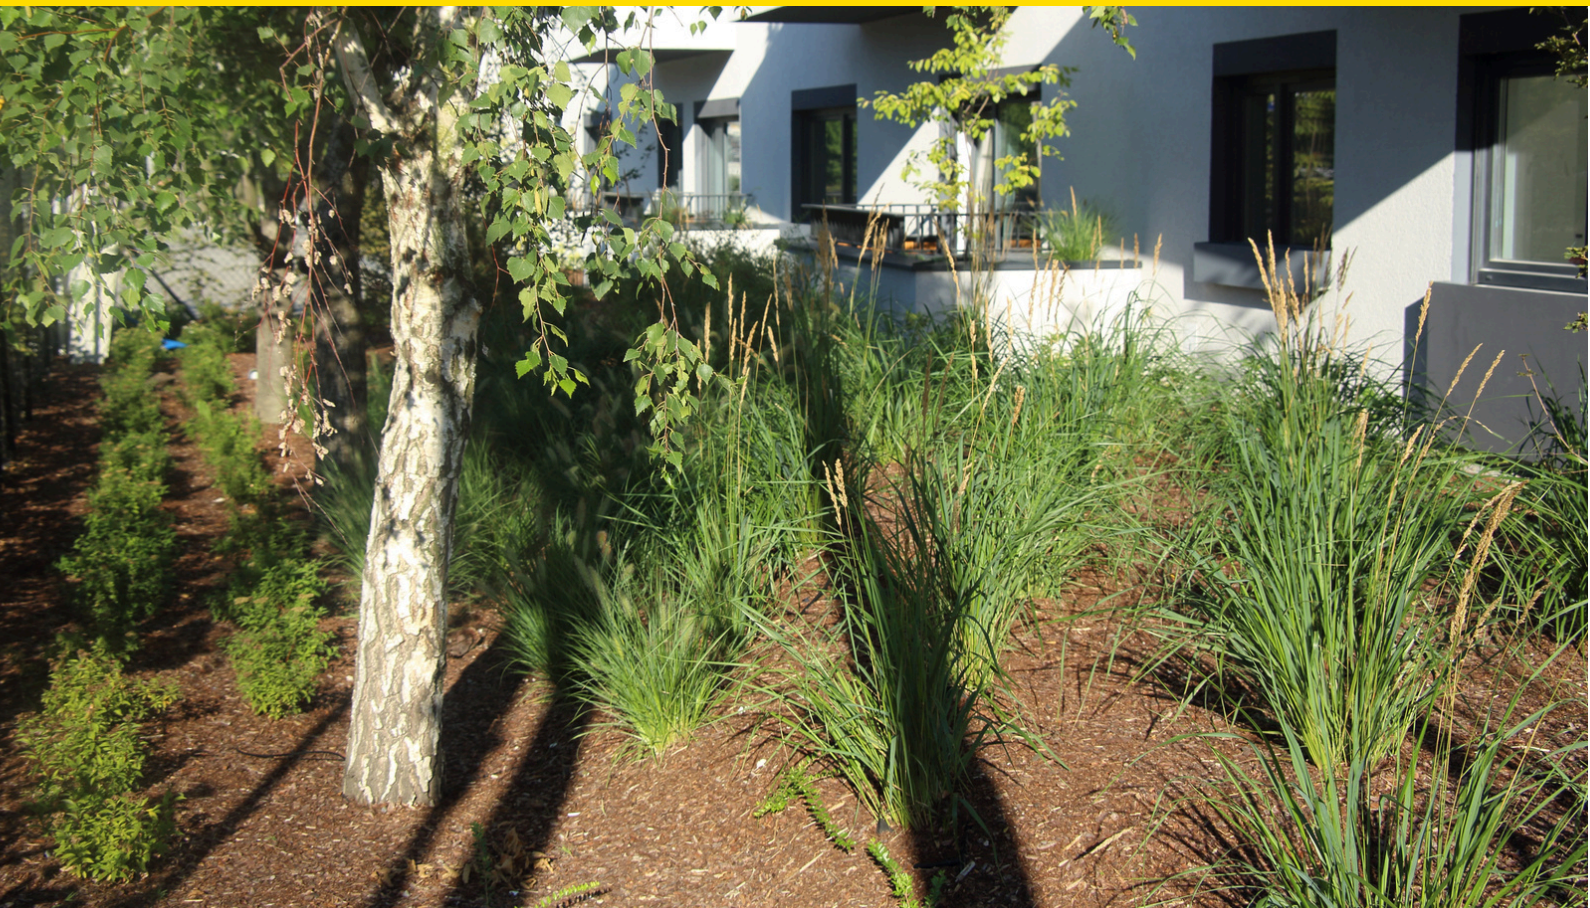

“Maintaining the balance between humans  
and the ecosystem is our priority”

ROMAN PUCHYŁA  
CEO
